

# Information Sheet

Issued 21 February 2017

# Paul Roos Gymnasium

Congratulations on vaccinating >90% of your learners!

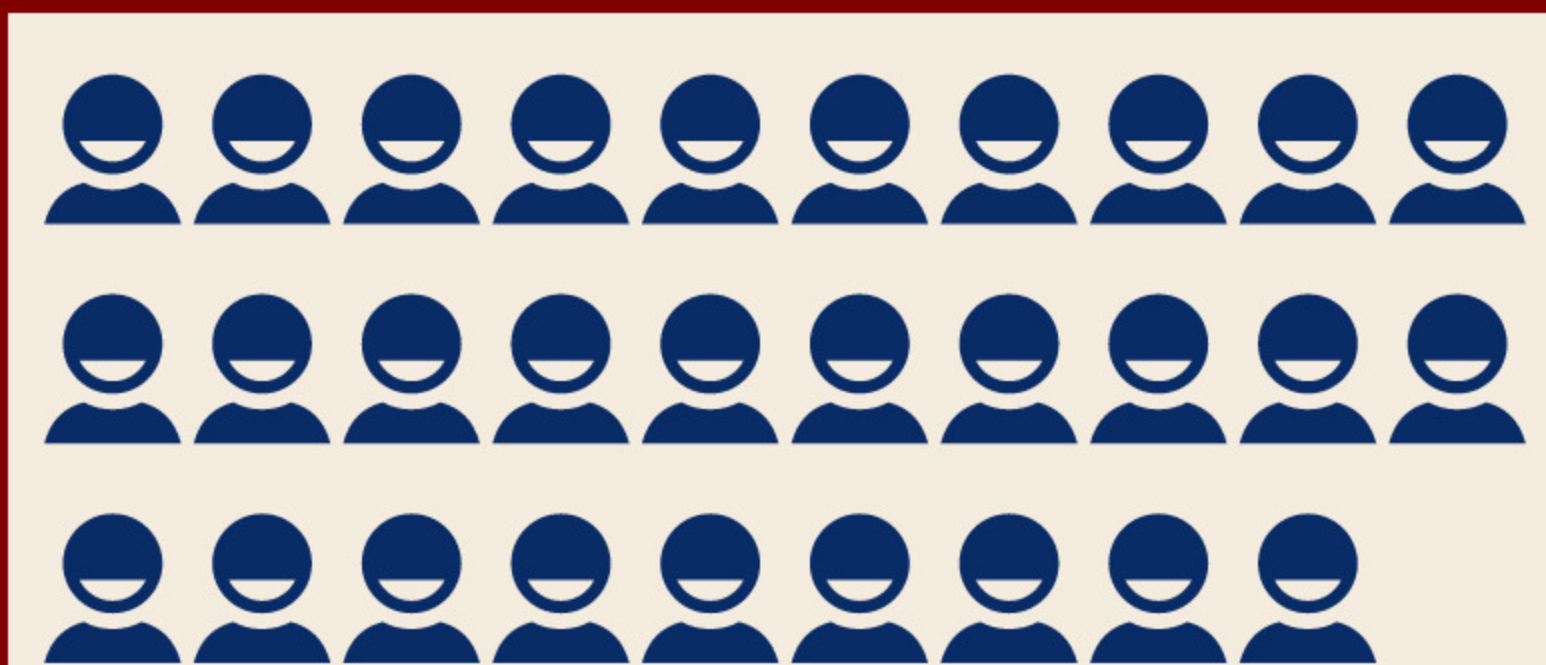

We estimate that you prevented  
**between 124 and 458 cases**  
of measles in your learners.

Where do these numbers come  
from?

To find out, visit  
[github.sacema.org/  
measles](https://github.sacema.org/measles)

## Summary

### Without vaccination

The outbreak could have looked like this.

### With vaccination

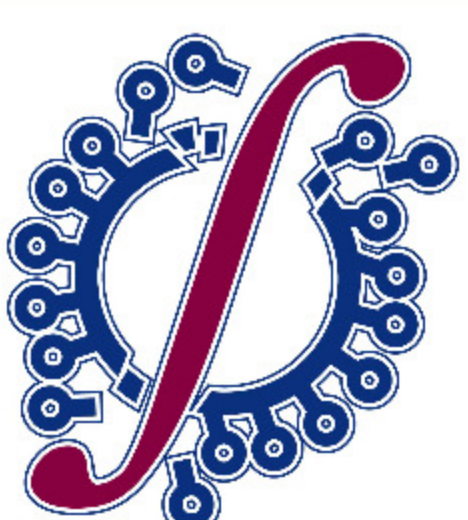

Now, the outbreak is  
expected to look more  
like this.

Each icon represents approximately 10 measles cases.

There have been no new cases for >14 consecutive days. The outbreak at PRG is probably over.
